

DEP VAC

THE SOLUTION IS LESS POLLUTION

**VAPOUR RECOVERY UNIT FOR
DEPOTS**

DepVAC

VAPOUR CONTROL SOLUTION FOR YOU

WHAT IS DEPVAC ?

CADABCO introduces a new, simple and Skid based Vapour Recovery System (DEPVAC) to the market, based on adsorption of activated carbon and regeneration by vacuum. DEPVAC is our vapour recovery solution for terminals, which could be optimized for each project according to the real vapour profile and the requested emission level. DEPVAC allows high flexibility in flow and concentrations.

WHAT IS OUR VISSION ?

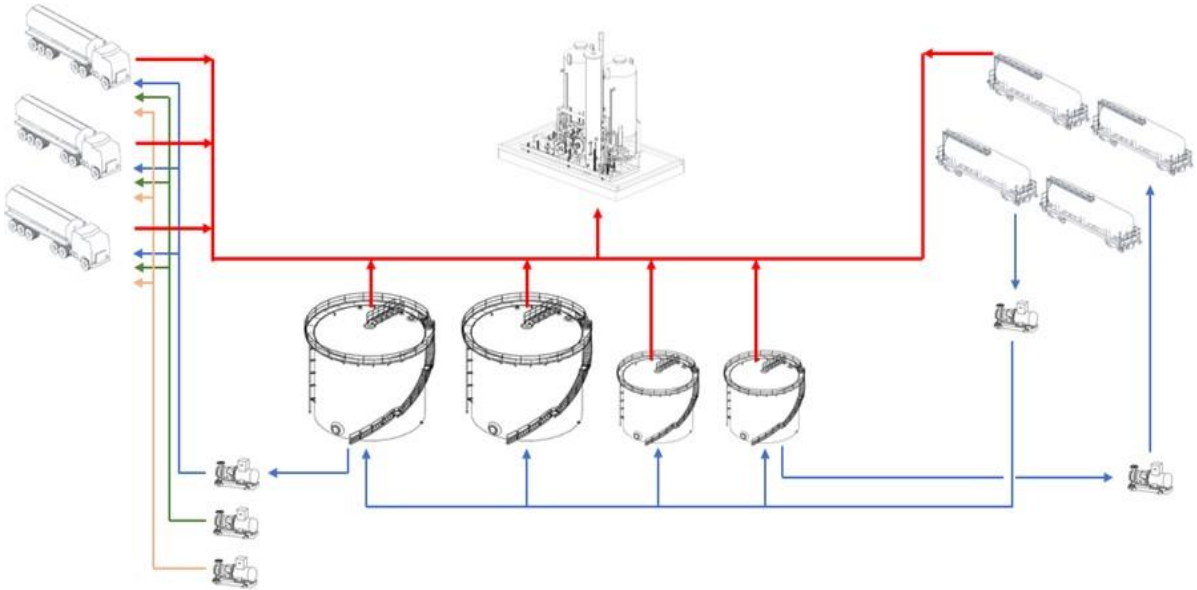

We convert waste gas emissions into Profit, keeping you in Compliance , while creating cleaner Environment Through good practices and gained knowledge we help our partners to improve their business environmental performance.

WHY US ?

The team of CADABCO is motivated and passionate one. We have over 15 years of experience in the field of the Hydrocarbon Vapour Recovery. We provide a scalable and feasible solution bringing economic benefit for the petrochemical industry, thus preserving the ecology and making the working environment greener and cleaner. We believe that with common efforts can achieve our goals of zero emissions in the atmosphere from the gasoline distribution process.

WHY WE NEED VAPOUR RECOVERY ?

The recovery of Volatile Organic Compounds (VOCs) is becoming an increasingly pressing topic. Now more than ever, the impact on the environment is under scrutiny. The emitted vapours contain VOCs along with benzene, xylene and toluene. Released into the air and heated up by the sun the VOCs help to increase the pollution in the atmosphere (known as smog), which can affect human health. The vapour recovery can provide significant environmental and economic advantages for all related parties.

YOU WOULDN'T WANT TO MISS DEPVAC

- ✓ Very low running costs.
- ✓ Measurable return on investment
- ✓ Reduced required space.
- ✓ Short delivery time.
